The “Golden Age” Myth

By Bert Archer (November 2016)

“We have visions of air travel from the 1950s and ’60s as glamorous, passengers lounging on sofas while nattily becaped air hostesses poured Champagne before serving the lobster. Now these things did happen – but the thing is, they still do, and for the exact same people they always did. **Air travel used to be ruinously expensive...** Even game shows only gave away trips to Florida and California.”

“The jet age was not for everybody... In short, the airline business has gotten more mature than it was when it catered mostly to the **rich, people who didn’t really care whether a ticket cost the equivalent of what an average** person made in a month, or two months. **It has moved from a luxury service to one that most of us use at least once a year.**”

Bert Archer, Canadian author and journalist, “Outraged by new airline fees? Here’s why they’re good news,” *The Globe and Mail* (Nov. 16, 2016)

Source: <https://www.theglobeandmail.com/life/travel/the-case-for-airline-ancillary-fees/article32879054/>

The “Golden Age” Myth

By Janet Bednarek (February 2023)

“Through the 1930s and into the 1940s, almost everyone flew first class. Airlines did encourage more people to fly in the 1950s and 1960s by introducing coach or tourist fares, but **the savings were relative**: less expensive than first class, but **still pricey**. In 1955, for example, so-called ‘bargain fares’ from New York to Paris were the equivalent of just over \$3,200 in 2023 dollars. Although the advent of jets did result in lower fares, the cost was still out of reach of most Americans... The demographics of travelers did begin to shift during [the 1960s]. More women, more young people, and retirees began to fly; **still, airline travel remained financially out-of-reach for most**. If it was a golden age, **it only was for the very few.**”

Janet Bednarek, University of Dayton, “Longing for the ‘golden age’ of air travel? Be careful what you wish for,” CNN Travel (Feb. 28, 2023)

Source: <https://www.cnn.com/travel/article/golden-age-of-air-travel-downsides/index.html>

Congressional Testimony on Deregulation and Innovation

By Jeffrey Shane (March 2023)

“Thanks to...the *miracle* of deregulation, America today enjoys a **highly competitive, rapidly evolving, technologically sophisticated airline industry**. A defining feature of the business today is its **continuing quest for innovation**, for new ways of attracting customers, for distinguishing competitors from each other, and even for crafting new business models. **After decades of struggle, the industry has found a way to maintain its financial health, thereby ensuring continued investment in consumer-facing improvements.**”

Jeffrey Shane, Under Secretary for Policy at the Department of Transportation, 2003-2008

Source: Testimony of Jeffrey N. Shane, Committee on Commerce, Science, and Transportation United State Senate, Hearing on Enhancing Consumer Protections and Connectivity in Air Transportation (March 23, 2023)

Cruising Altitude

By Zach Wichter, *USA Today* (August 7, 2024)

“Flying is great, despite all the complaints people have... Sure, flying used to be more luxurious, but that made it largely unaffordable. “Up until 1978, interstate and international airline routes and prices were controlled by the federal government via the Civil Aeronautics Board (CAB). Flights remained expensive even as technology made planes faster and more efficient. ‘It was becoming increasingly obvious that the regulatory agency, the CAB, was falling behind in the regulation. It would take years to approve new routes and fare structures,’ [Smithsonian curator of air transportation Bob] van der Linden said. **Overall, flying today is a much better deal in terms of dollars and cents than at almost any other time in history.”**

“Today you could, if you do some good shopping, you could fly transcontinental, say New York to San Francisco, for \$300,’ van der Linden said, noting that in actual dollar terms, it’s the same price as in 1930. ‘The price hasn’t changed, but the value of the dollar has, dramatically. **In 1930, \$300 could buy you an automobile.’”**

Source: Zach Wichter, “Now is a great and cheap time to fly, even if airlines aren't perfect,” *USA Today* (Aug. 7, 2024)

Traveling by Air Is Safer Than Ever

“These days, we barely think about safety when we board a plane...because **flying across the sky is safer than walking across the street**. Airplanes produce fewer deaths per mile than cars, ferries, trains, subways or buses...”

“The **U.S. aviation system has become so amazingly, unexpectedly safe that other industries** in the business of fatal risk, from healthcare to artificial intelligence, **are hoping to bring lessons of the sky back to hospitals and research labs on the ground.**”

Ben Cohen, “Flying in America Has Actually Never Been Safer,” *The Wall Street Journal* (Jan. 12, 2024)

Source: Ben Cohen, “Flying in America Has Actually Never Been Safer,” *The Wall Street Journal* (Jan. 12, 2024)

Traveling by Air Is Safer Than Ever (Cont'd)

“When **the risk of flying is so minuscule**, being afraid to board an airplane is hardly more justified than avoiding the supermarket for fear that the ceiling will collapse.”

“**The safety of flying in countries like the U.S. is the eighth wonder of the world.** Far from being nervous as we approach the airport, we should be awestruck that flying is so free of risk — and deeply grateful to those who have made it so.”

Arnold Barnett, George Eastman Professor of Management Science and professor of statistics at MIT Sloan School of Management, “Boeing, Airbus incidents have travelers asking, is it still safe to fly?” *The Hill* (Jan. 22, 2024)

Source: Arnold Barnett, “Boeing, Airbus incidents have travelers asking, is it still safe to fly?” *The Hill* (Jan. 22, 2024)

Economists Are Still Right About Airline Deregulation!

By Clifford Winston (January 2023)

“The airline industry has periods of fat profits, but **those profits are notoriously fickle**. And if they’re expected to stay in business in down times, airlines can’t be expected to sacrifice revenue generated when demand is high without trying to make it up elsewhere.”

Source: “Economists Are Still Right About Airline Deregulation!” Milken Institute (January 18, 2023)

As Real Airfares Plunged Post-Deregulation, Trips per Capita More Than Doubled

2024 Domestic Air Travel—Including Ancillary Services—Was ~50% Cheaper Than in 1979

Note: "Past 5 Years" category was not presented as a possible response preceding 2020.

Over Two-Thirds of Americans' Spending Now on Services—Up From Half in 1970

Air Travel Approaching 1% of U.S. Personal Consumption Expenditures

Source: Bureau of Economic Analysis

U.S. Seniors, Who Value Experiences Such as Travel, Constitute a Growing, Spending Force

Americans Age 65+ Accounted for ~22% of Spending in 2023 vs. ~15% in 2010

Share of U.S. Consumer Spending by Age Group

“Seniors’ high spending propensities reflect health, wealth and perhaps lingering psychological effects of the pandemic... **They have less consumer debt, minimal student debt and are more likely to own their homes outright.** Many of those who have mortgages refinanced at the unprecedented low in mortgage rates after the pandemic hit. They are also less likely to need to move due to an expanding family or a new job than Gen Z and Millennials, shielding them from the impact of rising housing costs.”

The Wall Street Journal (Oct. 8, 2023)
