

Airlines for America[®]

We Connect the World

The State of U.S. Commercial Aviation

Updated October 14, 2023

“To suggest that the airlines should have better prepared for this environment seems akin to suggesting Pompeii should have invested more heavily in firefighting technology.” (JPMorgan, Mar. 22, 2020)

<https://www.airlines.org/dataset/state-of-us-aviation/>

Key Points

- » U.S.-international ticket sales have been outpacing domestic sales.
- » Air cargo demand has subsided materially since reaching an all-time high in 2021.
- » As with numerous other industries, U.S. airlines have faced inflationary pressures across several cost categories (e.g., labor, fuel, maintenance, rents, landing fees).
- » As of August, U.S. passenger airlines had the largest workforce since Sept. 2001.
- » In large part, airlines are using cash flow to renew their fleets and aggressively retire the massive debt accumulated in 2020 and 2021 to weather the pandemic.
- » Debt—and interest expense—will likely remain elevated through 2024.

Airlines Are in Stage Three of the Multiyear Recovery From the Pandemic

Per Wells Fargo, the *Global* Economy Will Grow 2.3% in 2024

The U.S. Economy Is Projected to Grow Less Than 1%

“We have a stronger conviction that the economy likely will need to grow at a sub-trend rate for a few quarters, if it actually does not contract, to bring inflation back to 2% on a sustained basis.” (Wells Fargo, Oct. 13, 2023)

Projected 2024 Real GDP Growth (%)

In Isolation, U.S. Freight Rail Traffic Data Implies an Economic Slowdown

Slowdown Commenced in August 2021, But September 2023 Saw a Small Uptick

U.S. Freight Rail Traffic

12-Month Moving Average Weekly Rail Carloads

“**The freight recession is real**, and it stretches **across modes**, across air, trucking and rail.”

— Phil Levy, chief economist, Flexport

“I don’t know that we’ve ever seen freight demand fall this far, so fast and for so long, **without an accompanying economic recession.**”

— David Jackson, chief executive, Knight-Swift Transportation Holdings

Sources: Association of American Railroads (AAR) and David J. Lynch, “Truck drivers are leaving boom-and-bust supply chain jobs,” *The Washington Post* (July 31, 2023)

Broadly, U.S. Economic Activity Has Stabilized in 2023, With Recent Signs of Improvement

Weekly Economic Index Has Risen Since Early July

U.S. Consumer Sentiment Is Stable

Attributable to Slowdown in Inflation and Stability in Labor Markets

“Consumers are understandably unsure about the trajectory of the economy given multiple sources of uncertainty, for example over the possible shutdown of the federal government and labor disputes in the auto industry.”

(Joanne Hsu, University of Michigan, Sept. 29, 2023)

Source: University of Michigan

U.S. Small Business Optimism Fell Slightly in August and September

Well Below Pre-Pandemic Levels

“Owners remain pessimistic about future business conditions, which has contributed to the **low optimism** they have **regarding the economy**.” (NFIB Chief Economist Bill Dunkelberg, Oct. 10, 2023)

Source: National Federation of Independent Business via NFIB Research Center

Real U.S. Consumer Spending Rose to All-Time High in August 2023

Consumers Have Been Buoyed by Lower Inflation, Not Yet Deterred by Rising Interest Rates

“Normally, a downturn in freight shipments would signal the approach of a broader downturn. **But consumer spending...isn't collapsing. It's gradually slowing and pivoting from merchandise to services, such as insurance and air travel.** In the second quarter, consumer spending on services rose three times as fast as goods purchases, according to the Commerce Department.” (*Washington Post*, July 31, 2023)

Source: U.S. Bureau of Economic Analysis and Bureau of Labor Statistics via Federal Reserve Bank of St. Louis

Note: Personal consumption expenditures (PCE) and inflation are seasonally adjusted and annualized

Relative to the U.S. Economy, Domestic Airline Capacity Is in Line With 2018-2019

Constraints Include ATC Staffing, Aircraft/Engine Delivery Delays and Regional Airline Pilot Supply

U.S. DOT: Air Traffic Control Is Understaffed by About 3,000 Positions

“Air traffic control in the United States is understaffed by about 3,000 positions, Transportation Secretary Pete Buttigieg told CNN on Friday... The...ATC workforce currently numbers about 11,500 controllers, but ‘the optimal number is closer to about 14,500,’ the secretary said. The numbers are similar to the agency’s assessment this spring that **about one in five controller positions nationwide are vacant.** ‘**We have thousands of controllers in training right now but also a number who are eligible to retire,**’ Buttigieg said.”

Source: “Buttigieg says FAA is about 3,000 air traffic controllers short,” Greg Wallace, CNN (May 5, 2023)

DOT Inspector General: FAA Faces Controller Staffing Challenges as Air Traffic Operations Return to Pre-Pandemic Levels at Critical Facilities

“FAA has made **limited efforts to ensure adequate controller staffing at critical air traffic control facilities**. The Agency also has **yet to implement a standardized scheduling tool** to optimize controller scheduling practices at these facilities... As a result, **FAA continues to face staffing challenges and lacks a plan to address them**, which in turn poses a risk to the continuity of air traffic operations.”

FAA Certified Professional Controller Staffing by Fiscal Year
