

The State of U.S. Commercial Aviation

Updated March 23, 2024

"To suggest that the airlines should have better prepared for this environment seems akin to suggesting Pompeii should have invested more heavily in firefighting technology." (JPMorgan, Mar. 22, 2020)

https://www.airlines.org/dataset/state-of-us-aviation/

Key Points

- » The U.S. economy and air travel remain healthy. Air cargo demand has subsided materially since reaching an all-time high in 2021 but remains solidly above pre-pandemic levels.
- » Post-pandemic YOLOism and the prevailing (though not universal) shift toward hybrid work have been positive for the sector and bode well for the medium term.
- » Airlines of all shapes and sizes continue to retool products and networks to reflect the changing face of demand and to cope with inflation. Capacity growth rates—and profit margins—differ widely.
- » ATC issues, aircraft/engine deliveries, pilot supply/costs, maintenance sector bottlenecks and workforce productivity have curbed flight growth and accelerated up-gauging of domestic fleets.
- » U.S. airlines have faced widespread inflation (e.g., labor, fuel, maintenance, rents).
- » In large part, airlines have been using cash flow to add staff (most since Sept. 2001), renew fleets, upgrade IT and retire the massive debt accumulated in 2020 and 2021 to weather the pandemic.

Airlines Are in Stage Three of the Multiyear Recovery From the Pandemic

Contain the Virus

Stabilize the Economy

Increase Efficiency

Aviation-Government Collaboration on Health/Facilitation/Safety/Technology

Traffic Recovery

Revenue Recovery

Financial Recovery

Cost-Reduction Initiatives + Business Model Adaptation + Debt Reduction

Reduce Cash Burn

Restore Profitability & Rebuild Margins

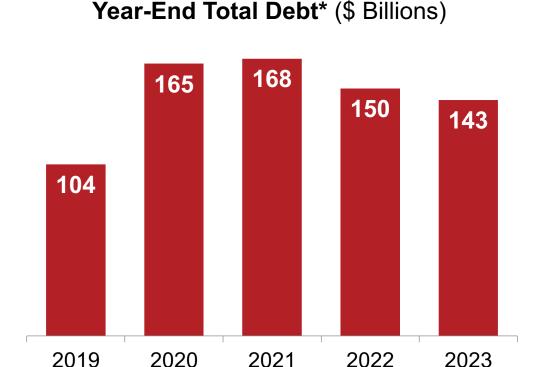

Repair Balance Sheets

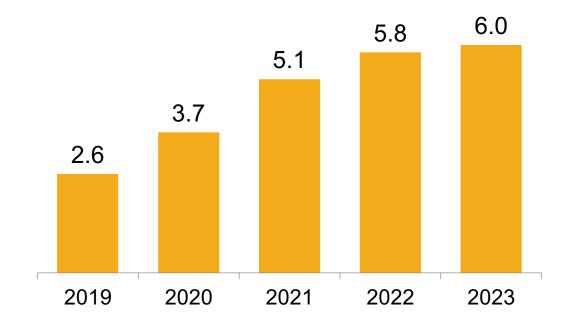

Airlines Have Prioritized Debt Reduction, Accompanied by Heavy Cash Outlays for Interest

Interest Expense Doubled From 2019-2021 and Reached \$6B in 2023

"For 2021 and beyond, we anticipate a major deleveraging cycle as the industry will have no choice but to address its significant debt load." (Deutsche Bank, "Airline Industry Update," July 1, 2020)

U.S. Consumer Sentiment Soared in December and January to Highest Level Since July 2021

U.S. Misery Index Has Fallen Sharply, But Business Optimism Remains Depressed

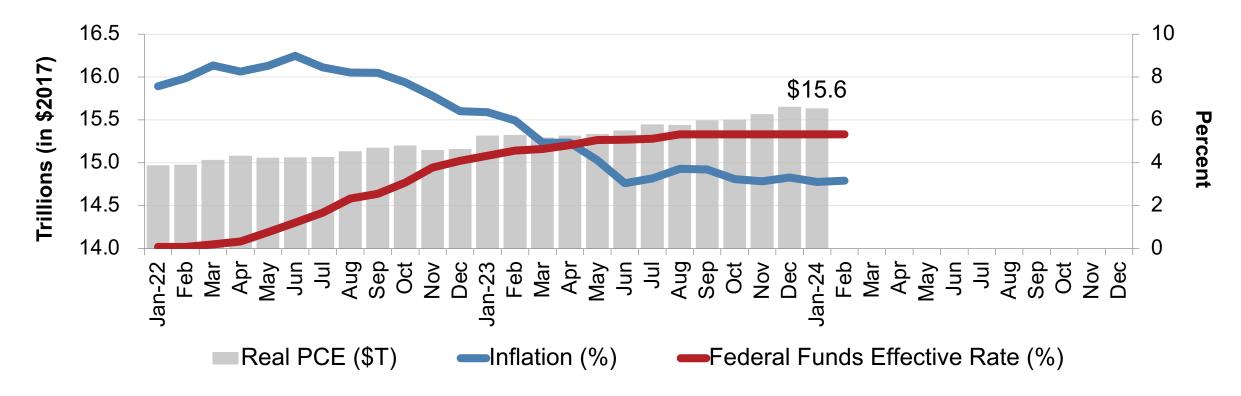

Sources: University of Michigan, Bureau of Labor Statistics (via Federal Reserve Bank of St. Louis) and National Federation of Independent Business via NFIB Research enter

U.S. Consumer Spending Subsided Modestly in January From All-Time High in December 2023

Consumers Have Been Buoyed by Lower Inflation, Undaunted by Elevated Interest Rates

"Normally, a downturn in freight shipments would signal the approach of a broader downturn. But consumer spending...isn't collapsing. It's gradually slowing and pivoting from merchandise to services, such as insurance and air travel. In the second quarter, consumer spending on services rose three times as fast as goods purchases, according to the Commerce Department." (Washington Post, July 31, 2023)

Share of Remote Work Has Stabilized Well Above Pre-Pandemic Level

Hybrid Workers, Who Earn the Most, Have Time and Money to Spend on Air Travel

% of U.S. Resident Full-Time Employees by Working Arrangement (Dec-2023) and Earnings (1H23)

- Fully in-person work is most common for front-line jobs that require working with equipment or interacting with customers on site.
- Hybrid schemes are most common among professionals and managers.
- Fully remote work is most common for jobs that require little interaction, such as IT support, and in the tech industry.

U.S. Seniors, Who Value Experiences Such as Travel, Constitute a Growing, Spending Force

Americans Age 65+ Accounted for ~22% of Spending in 2022 vs. ~15% in 2010

Share of U.S. Consumer Spending by Age Group

"These are the consumers that will matter over the coming year," said Susan Sterne, chief economist at Economic Analysis Associates. 'Our large share of older consumers provides a consumption base in times like today when job growth slows, interest rates rise and student-debt loan repayments begin again.'

Seniors' high spending propensities reflect health, wealth and perhaps lingering psychological effects of the pandemic... They have less consumer debt, minimal student debt and are more likely to own their homes outright. Many of those who have mortgages refinanced at the unprecedented low in mortgage rates after the pandemic hit. They are also less likely to need to move due to an expanding family or a new job than Gen Z and Millennials, shielding them from the impact of rising housing costs."

U.S. DOT: Air Traffic Control Is Understaffed by About 3,000 Positions

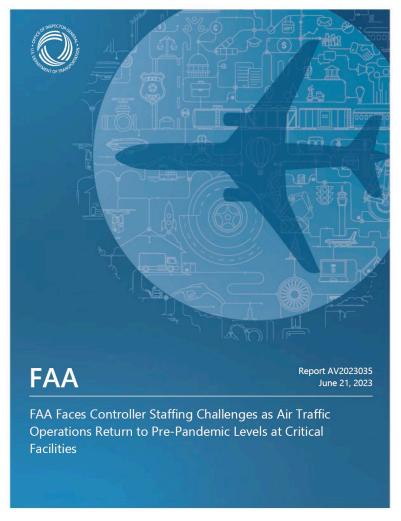

"Air traffic control in the United States is understaffed by about 3,000 **positions**, Transportation Secretary Pete Buttigieg told CNN on Friday... The...ATC workforce currently numbers about 11,500 controllers, but 'the optimal number is closer to about 14,500,' the secretary said. The numbers are similar to the agency's assessment this spring that about one in five controller positions nationwide are vacant. We have thousands of controllers in training right now but also a number who are eligible to retire,' Buttigieg said."

Source: "Buttigieg says FAA is about 3,000 air traffic controllers short," Greg Wallace, CNN (May 5, 2023)

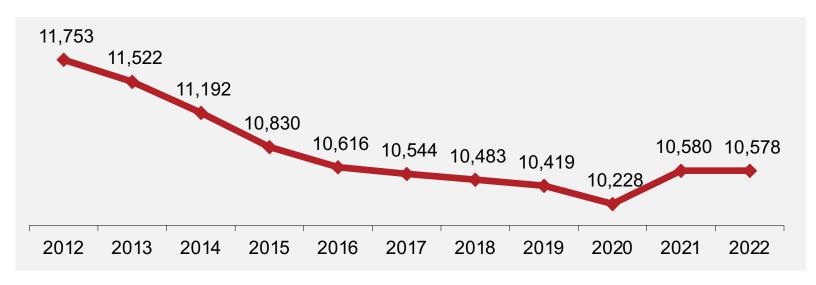

DOT Inspector General: FAA Faces Controller Staffing Challenges as Air Traffic Operations Return to Pre-Pandemic Levels at Critical Facilities

"FAA has made limited efforts to ensure adequate controller staffing at critical air traffic control facilities. The Agency also has yet to implement a standardized scheduling tool to optimize controller scheduling practices at these facilities... As a result, FAA continues to face staffing challenges and lacks a plan to address them, which in turn poses a risk to the continuity of air traffic operations."
