* Headcount as of Dec-2024; other statistics reflect daily average for 2024

Key Points

- » Airlines of all shapes and sizes continue to retool products and networks to reflect the changing face of demand and to cope with inflation, but **growth rates—and profit margins—differ widely**.

“[W]e no longer believe cost structures to be the primary determinant of profitability the way they once were, before the industry successfully de-commoditized and product/network quality took on increased relevance with consumers.” — Jamie Baker, J.P. Morgan (Feb. 12, 2026)

- » In large part, airlines have been using **cash flow** to add staff, renew fleets, upgrade ground equipment and IT and retire the massive **debt** accumulated in 2020-2021 to weather the pandemic.
- » Most airlines are pursuing high-margin revenue diversification, earnings durability, equity appreciation and balance sheet fortification.

For U.S. Airlines, Air-Cargo and Air-Travel Demand Subsided in 2Q and 3Q 2025

But Demand Remains Well Above Pre-Pandemic Levels

Source: Bureau of Transportation Statistics (Form 41 Schedule T1 and T100 segment data) * Cargo revenue ton miles (RTMs) flown on U.S. passenger and cargo-only airlines in scheduled and nonscheduled services

Airlines Have Prioritized Debt Reduction, Accompanied by Heavy Cash Outlays for Interest

Debt Levels Fell \$31B From 2021-2024, But Interest Expense Remains Elevated

“To suggest that the airlines should have better prepared for this environment seems akin to suggesting Pompeii should have invested more heavily in firefighting technology.” (Jamie Baker, JPMorgan, March 22, 2020)

“For 2021 and beyond, we anticipate a major deleveraging cycle as **the industry will have no choice but to address its significant debt load.**” (Michael Linenberg, Deutsche Bank, July 1, 2020)

Year-End Total Debt* (\$ Billions)

Interest Expense (\$ Billions)

Economists Remain Downbeat, But Perceived Risk of U.S. Recession Has Subsided

WSJ Survey: Probability of Recession Over Next 12 Months: 27% (as of January)

Probability the U.S. is in a recession in next 12 months including today

“Economists assigned a 27% probability of a recession over the next 12 months, the lowest in a year. **Risks to the outlook include the fight over Fed independence, the potential impact of tariffs on inflation, and sluggish job growth** pressuring the finances of lower- and middle-income households.”

“**The growth in the economy is being fueled by consumers in the top 20% of the income spectrum**, who benefited from a rising stock market that’s fueled by massive investments on AI and data centers. Fine for now. But it **makes the economy quite vulnerable to any sudden pullback in equity values**,” said Bernard Baumohl, chief global economist at the Economic Outlook Group.”

Source: Harriet Torry and Anthony DeBarros, “Economists Shrug Off Trumponomics, Boost 2026 Growth Outlook Back Above 2%,” *The Wall Street Journal* (Jan. 18, 2026)

Perspectives on the U.S. Economic Outlook

“The US economy remains resilient, but **the signal has become harder to read...** Beneath the surface, **the pattern is distinctly K-shaped. Affluent households continue to spend, supported by income and wealth gains, while middle- and lower-income families are turning more cautious** heading into the holiday season. Business investment outside technology has taken on a more defensive tone, and tariff-related cost pressures are gradually filtering through supply chains.”

Gregory Daco, Chief Economist, EY (Nov. 28, 2025)

“**The economy is growing, but its growth is fragile.** Whether the economy strengthens or instead slumps in the coming year depends primarily on how aggressively the Trump administration pursues its **tariff, immigration and other deglobalization policies**; how quickly businesses adopt and incorporate **artificial intelligence** into their workflows; and how much **monetary and fiscal support** is provided by the Federal Reserve and lawmakers.”

Mark Zandi, Chief Economist, Moody's Analytics (Jan. 21, 2026)

Sources: <https://www.linkedin.com/pulse/us-outlook-2026-numbers-mark-zandi-jof6e/>

Perspectives on the U.S. Economic Outlook (Continued)

“There is a **growing divide between assessments of the economy’s performance**. Judging that performance based on recently stronger GDP growth and ebullient investors, the economy is doing well, if not great. But based on jobs and how dour the majority of Americans feel about their finances, the economy’s performance is lagging, if not faltering. So which is it? While **the reality likely lies somewhere between these two widely differing perspectives**, the old saw ‘better to prepare for the worst and hope for the best’ is apt.”

Mark Zandi, Chief Economist, Moody’s Analytics, “U.S. Outlook: GDP Optimists vs. Jobs Pessimists” (Feb. 10, 2026)

“I mean, there is certainly — pick your description — a **K-shaped economic bifurcation of the consumer**. We continue to see really consistent strength across luxury for the full year.”

Anthony Capuano, Marriott CEO (Feb. 10, 2026)

Sources: <https://www.linkedin.com/pulse/us-outlook-gdp-optimists-vs-jobs-pessimists-mark-zandi-ybqpe/> and 0

U.S. Consumer Sentiment Ticked Up in January and February

Higher Levels of Sentiment Correlated With Higher Levels of Income

“Not all Americans are feeling the affordability squeeze. **The finances of the well-to-do are arguably as good as they have ever been.** They have a job, and they are enjoying sturdy wage growth. If they have any debt, it is a mortgage loan they refinanced during the pandemic at an exceptionally low rate. They have ample cash in their checking and money market accounts...and **their wealth has ballooned with the surge in home values and stock prices.**”

Mark Zandi, Chief Economist, Moody’s Analytics, “The Affordability Squeeze,” *LinkedIn* (Dec. 9, 2025)
